The well-known parrot, Loleta, belonging to Mrs. Sarah LeCato, widow of the late Senator LeCato, recently died in Berlin, Md., the present home of Mrs. LeCato. Loleta was, in many respects, a wonderful bird, and her many admirers who saw her at Wachapreague, will be sorry to hear of her death. She was brought here from South America about fifteen years ago. She had perhaps uttered more distinct words, sung more songs and hymns, and whistled more tunes than any bird of her age. Her favorites were "Swanee River," "I am so glad that Jesus loves me," and some waltz tunes. Strange to say, unlike most parrots, she was never heard to utter a profane word.

Contributions Asked to Fight Railroad Co. in Supreme Court.
Mr. Editor:—Having been solicited to secure funds for the purpose hereinafter named, I ask that you allow me space in your valued paper to make the following statement: During the berry season of 1904, certain consignments of berries were made by certain farmers in the upper part of Accomac to Newark, N. J. The New York, Philadelphia and Norfolk Railroad Company received the goods in good condition, but owing to negligence upon the part of said railroad company, or its connecting lines, the goods were delivered many, many hours behind time and in a damaged condition, consequently small claims for damages arose against the said company and warrants were obtained. These claims ran from \$3.00 to about \$10.00. One of these small warrants was heard by the magistrate of Atlantic Magisterial District and after a stubborn resistance by the attorney for the said company, judgment was entered against the said company.

The usual policy of spending hundreds of dollars in litigation, sooner than pay the farmers these small just claims, was pursued by the said company and an appeal was taken by the railroad company to the Supreme Court of Appeals of Virginia, upon the ground that the said company was not responsible for produce damaged beyond its own line, although it could and would charge exorbitant freight rates the entire route, to the point of destination.

If the contention of the railroad company is sustained in the Supreme Court, it will prove a serious blow to every farmer on the shore, therefore, it would be a wise course if every farmer would make a small contribution to defray the expenses in fighting the railroad company in the Supreme Court. An appeal is made to all farmers, and those who are interested in the farmers, to send their contributions to the Temperanceville Bank. Hoping that every one will realize the importance of this matter, I am

Yours truly
W. L. Nock.

Letter to I. B. Clarke.
Accomac, Va.
Dear Sir: If it took 10 gallons to paint your house last time with somebody else's paint, and takes 8 with Devco, we save you \$5 or \$10; for painting costs two or three times as much as paint.

Mr. Ezra Rathmell, Williamsport, Pa., always used 11 gallons of mixed paint for his house; Devco took 6. But that isn't all; that's only first cost; how long will it wear?

The paint, that goes furthest in covering, wears best too.

All paint, true paint, and full-measure, are on one side; part paint, false paint, and short-measure are on the other. What can you expect?

Yours truly,
F. W. Devco & Co.

Telephone Service at Nominal Cost.
During the last several years, the farmers in Accomac and Northampton counties have made rapid strides toward increasing the producing power of the farm, decreasing the expenses and minimizing the work. Radical changes have also been made in the method of conducting the business end of farm work. In order to further this movement, and at the same time place the most useful of all farm implements within the reach of every farmer, the Diamond State Telephone Company has made a special concession to farmers and country residents in these two counties, and will install telephone service in farm houses at the nominal cost of fifteen (\$15.00) dollars per year. This reduction in farmer's rates has been decided on after careful consideration by the officers of the company, and was made to meet conditions peculiar to this particular section of country.

The telephone is a most important factor in the business end of farm work, and with the adoption of the special farmers rate it is expected that within the next few months more telephones will be installed in this vicinity than was ever expected by the company. The installation of telephones in farm houses will, of course, make the service more valuable to merchants and residents of the towns, and in this way greatly increase the utility of telephone service in these counties.

This rate will be put into effect at once, and the farmers who are interested in telephone service should make application at an early date, as it takes considerable time to construct lines and install instruments.

I will be at Atlantic for the practice of my profession on Thursday and Friday, November 9th and 10th, 1905.
